Weekly Summary

Our focus this week was meeting with one another and with our advisor to re-focus on our project goals. Much implementation work was done on the project over the summer by Dalton and David as part of research assistantships with Dr. Rajan. Because of these changes to the code base since the senior design group halted work last Spring, Dr. Rajan has asked that we put the project on hold while he considers the project's goals.

Technical Progress

None, since Dr. Rajan asked for us to temporarily pause any technical progress while we reconsider the project's goals.
