Weekly Report

Team Dec 15-12

Week 7: *Oct. 5th - Oct. 11th*

Advisor	Dr. Rajan	
Client	Dr. Rajan	
Team Members	Dalton Mills	*Webmaster*
	David Johnston	*Team Lead*
	Trey Erenberger	*Key Concept Holder*
Project	@PaniniJ	

Weekly Summary

This was a slow week for us. We had interviews following the Career fair and exams. There were some important technical contributions to the project, but they were relatively small.

Technical Progress

Additional static checks were implemented, some more static checks to be implemented were identified and Panini Custom was implemented. Panini Custom are pre-ducked classes. They can be used in place of common return types to improve speed. The panini custom class that was implemented is "String".

Meetings

Weekly Advisor Meeting
Members Present: All
Additional Participants: Dr. Rajan
Date & Location: Wednesday 7 of October; Atanasoff 216
Minutes:
- This was a very short meeting.
- We didn't have much progress done early in the week, so Dr. Rajan just urged us to continue working.

Contributions

Individual Contributions

Trey Erenberger
- Meetings Attended: All

David Johnston
- Meetings Attended: All
- Code Written: Working on static checks and tests for the static checks. In particular, worked towards issue #70 (`init()` checks) and closed issue #59 (nested types checks). Also identified two additional checks to be implemented: Issues #85 and #86.

Dalton Mills
- Meetings Attended: All
- Code Written: Added support for Panini Custom (Issue #81) (PR #84)

Individual Hourly Contributions

Trey Erenberger	0 Hours
David Johnston	7 Hours

Dalton Mills   6 Hours

Tentative Plans for Week 8

We planned for Dalton and Trey to begin work on Documentation, and David will continue work on static checks.
